Smart Temperature Sensor

MindoLife's Smart Temperature Sensor is a temperature monitoring device which can be placed at any location in the house. It enables a secured remote temperature sensing in a room over the air and via the internet thus providing information which can be used for smart scenarios. Using the monitored temperature to start/stop/adjust climate control, closing/opening shutters when it is too cold/hot and countless more configurable smart scenarios to suit one's habits and specific needs. It is Easy to install, long lasting battery powered and does not require any changes to the home electric grid

Item number: #MTS310v3.2
Min measurement temperature : -40
Max measurement temperature: 40
RF Standard: IEEE 802.15.4
Voltage: 3.0v
Power source: 2 AAA 1.5v batteries
Max. Current: 30ma
Encryption: AEC-CCM
Security: MindoLife smart home security protocol

MindoLife smart home sensors are Low power devices working with standard AA batteries.

MindoLife low power protocol decrease power consumptions and enable a long batteries life with no need to replace.

Installation steps:

- Choose a proper monitoring point to place the sensor
